

# 90 Day Fill Program

## Maintenance Medications List

Effective January 1, 2018

Are you on a long-term medication to manage a health condition?

As part of your benefit package, maintenance (long-term) medications must be filled in 90-day quantities through our Home Delivery Program or at participating extended supply network pharmacies. Extended supply network pharmacies are retail pharmacies that can fill larger amounts of medications at one time.

If your medication is on this list, your prescription benefit helps you save money and stay on your treatment plan.

Please note, due to the large number of available medications this list may not be all inclusive. Coverage of specific formulations and dosage strengths are subject to your plan's benefit and covered drug list (formulary) status. Oral contraceptives are a part of this list and included in the benefit. Please refer to your health plan website for the most up to date list as this publication is subject to change.
